### Research Summary

Recycled polyester yarn is a type of yarn made from recycled PET (polyethylene terephthalate) plastic bottles or other post-consumer polyester waste. The recycling process involves collecting, sorting, cleaning, and melting down the plastic waste into pellets, which are then extruded into fine filaments to create recycled polyester yarn. This yarn retains similar properties to virgin polyester yarn, including strength, durability, and moisture-wicking capabilities, but it has the added benefit of reducing environmental impact by diverting plastic waste from landfills and reducing the need for virgin polyester production. Recycled polyester yarn is commonly used in the textile industry to produce various products such as clothing, upholstery, carpets, and accessories, offering a sustainable alternative to conventional polyester yarns.

The major global manufacturers of Recycled Polyester Yarn include Haili Environmental Technology, Eastern Shenghong, Aditya Birla Yarn, LIBOLON, Revalyu Recycling, ALLIANCE FIBRES LTD, etc. The global players competition landscape in this report is divided into three tiers.
