### Research Summary

Refrigerant leak detectors are specialized devices designed to identify and locate leaks in refrigeration and air conditioning systems. These leaks can occur in the pipes, joints, valves, or other components of the system and may lead to the release of refrigerant gases, posing environmental and safety concerns. Refrigerant leak detectors operate by sensing the presence of refrigerant gases in the air. There are various types of leak detectors, including electronic, ultrasonic, and infrared models. Electronic leak detectors use sensors to detect changes in the concentration of refrigerant gases, triggering alarms or alerts. Ultrasonic detectors detect the high-frequency sounds produced by a refrigerant leak. Infrared detectors identify the specific infrared radiation emitted by certain refrigerant gases. Regular use of refrigerant leak detectors is crucial for maintaining the efficiency of cooling systems, preventing environmental damage, and ensuring the safety of occupants in spaces where refrigeration and air conditioning systems are in operation.

The major global manufacturers of Refrigerant Leak Detectors include Inficon, Robinair,
