Research Summary

A removable partial denture (RPD) is a dental prosthetic device designed to replace missing teeth in a patient's mouth. Unlike a complete denture that replaces all the teeth in an arch, an RPD is used when some natural teeth remain. The RPD consists of replacement teeth attached to a framework, which may be made of metal or acrylic material. This framework is custom-designed to fit around the remaining natural teeth and may have clasps or connectors to provide stability and retention. The RPD is removable, allowing the wearer to take it out for cleaning and maintenance. It helps restore both function and aesthetics by filling the gaps left by missing teeth, improving chewing ability, speech, and the overall appearance of the smile.

The major global manufacturers of Removable Partial Denture include Dentsply Sirona, Glidewell, Aspen Dental Management, Ivoclar Vivadent, Modern Dental, Veden Dental Group, Kulzer, VITA Zahnfabrik, SHOFU, Huga Dental, Shenzhen Jiahong Dental, KTJ, Kaisa Health Group Holdings, Jiahong Dental, etc. The global players competition landscape in this report is divided into three tiers.
