Research Summary

Rice husk ash (RHA) is the ash generated when rice husks, the outer layer of rice grains, are burned or incinerated. This byproduct is obtained from the combustion of rice husks, which are abundant agricultural residues. Rice husk ash contains a high percentage of amorphous silica, making it valuable for various applications. It is commonly used in construction materials, such as concrete, as a pozzolan or supplementary cementitious material. The amorphous silica in rice husk ash reacts with calcium hydroxide in the presence of water, forming additional cementitious compounds, enhancing the strength and durability of the concrete. Additionally, rice husk ash finds application in the production of refractory materials, ceramics, and as a source of silica for various industrial processes. Its utilization not only provides a sustainable solution for agricultural waste disposal but also contributes to resource efficiency in multiple industries.

The major global manufacturers of Rice Husk Ash include Yihai Kerry Investments, Usher Agro, Guru Metachem, Agrilectric Power, Rescon (India), Deelert, Jasoriya Rice Mill, etc. The global players competition landscape in this report is divided into three
