Research Summary

Rice husk silica refers to the amorphous silica extracted from rice husks, the protective outer layer of rice grains. The ash generated by burning or incinerating rice husks contains a significant amount of silica, and through appropriate processing, this silica can be extracted and purified for various applications. Rice husk silica is known for its high purity and fineness, making it suitable for use in industries like agriculture, construction, and materials science. In agriculture, it can be applied as a soil amendment to improve soil structure and nutrient retention. In the construction industry, rice husk silica is used as a pozzolan in cement and concrete formulations, enhancing their strength and durability. The utilization of rice husk silica not only offers a sustainable solution for the disposal of agricultural waste but also contributes to resource efficiency and the development of eco-friendly materials in various sectors.

The major global manufacturers of Rice Husk Silica include Yihai Kerry, Wadham Energy, Agrilectric Power, Oryzasil, Jiangxi Jinkang Advanced Material, Anhui Evosil Nanomaterials Technology, BSB Nanotechnology, Green Silica Group, Brisil,
