### Research Summary

Safe Load Indicators (SLIs) are devices used in various lifting equipment, such as cranes, hoists, and forklifts, to ensure safe and efficient operation by monitoring the load being lifted. These indicators provide real-time information about the weight of the load, as well as factors such as load distribution, tilt, and stability, helping operators to prevent overloading and maintain safe working conditions. SLIs typically consist of sensors, display units, and alarms, which alert operators when the load approaches or exceeds the safe operating limits. By implementing Safe Load Indicators, industries can enhance workplace safety, minimize the risk of accidents, and comply with regulatory standards governing lifting operations.

The major global manufacturers of Safe Load Indicators include Wika, Rayco-Wylie, Yichang Jinglian, TWG Dover, Parker Electronic Controls, Cranesmart Systems, Weite Technologies, Suns Technology, Wylie Indicators, Shanghai Xiya, Wide Technology, Keli Sensing, Yichang Wanpu, Chengdu Hi-Tech Crane Safety, Markload Systems, PAT-Kruger, etc. The global players competition landscape in this report is divided into three
