Research Summary

Safety glasses are protective eyewear designed to shield the eyes from potential hazards in various work environments or activities. These glasses typically feature impact-resistant lenses made from materials such as polycarbonate or trivex, which are capable of withstanding high-velocity impacts from flying debris, particles, or projectiles. Safety glasses may also have wraparound frames to provide full coverage and protection to the eyes from all angles. Additionally, they often incorporate features such as anti-scratch coatings, anti-fog coatings, and UV protection to enhance durability, clarity, and comfort. Safety glasses are essential personal protective equipment (PPE) in industries such as construction, manufacturing, woodworking, and laboratories, where eye injuries from airborne particles, chemical splashes, or flying objects are common. By wearing safety glasses, individuals can significantly reduce the risk of eye injuries and maintain their vision safety in hazardous environments.

The major global manufacturers of Safety Glasses include 3M, Honeywell, Boll? Safety, MSA Safety, Radians, Kimberly-Clark, Gateway Safety, ESS Eye Pro, MCR Safety,
