### Research Summary

Sandpaper, also known as abrasive paper, is a versatile tool used in woodworking, metalworking, and various other applications for smoothing surfaces, removing material, and achieving desired finishes. It consists of abrasive particles bonded to a flexible backing material such as paper, cloth, or film. The abrasive particles may be made of various materials, including aluminum oxide, silicon carbide, or diamond, each offering different levels of hardness and aggressiveness. Sandpaper is available in a range of grit sizes, with lower numbers representing coarser grits for heavy material removal and higher numbers indicating finer grits for smoother finishes.
