Research Summary

A SATCOM (Satellite Communication) power amplifier is a specialized electronic device designed to amplify signals in satellite communication systems. It typically operates at microwave frequencies and is responsible for boosting the transmitted signals to higher power levels before they are transmitted from the satellite to the ground station or vice versa. SATCOM power amplifiers are crucial components in satellite communication systems, as they help compensate for signal losses incurred during transmission through the atmosphere and space. These amplifiers are characterized by their high output power, efficiency, linearity, and reliability, ensuring robust and reliable communication links between satellites and ground stations for applications such as television broadcasting, telecommunication networks, internet services, and military communication.

The major global manufacturers of SATCOM Power Amplifier include L-3 Narda-MITEQ, General Dynamics SATCOM Technologies, Communications & Power Industries, Kratos, Agilis, Comtech PST, Norsat, Advantech Wireless, Amplus, Tango
