### Research Summary

Selenium-enriched yeast is a nutritional supplement created by fermenting yeast with selenium-rich substrates, resulting in the accumulation of selenium within the yeast cells. This process converts inorganic forms of selenium into organic forms that are more bioavailable and easily absorbed by the body. Selenium-enriched yeast is a popular dietary source of selenium due to its natural origin and superior bioavailability compared to inorganic selenium supplements. It provides an efficient means of incorporating selenium into the diet, offering various health benefits such as supporting immune function, thyroid health, antioxidant activity, and potentially reducing the risk of certain chronic diseases. As such, selenium-enriched yeast is commonly used in food fortification, animal feed supplementation, and dietary supplements to address selenium deficiency and promote overall health and well-being.

The major global manufacturers of Selenium-enriched Yeast include Alltech, Lesaffre, Angel, Pharma Nord, Lallemand, Novus International, Associated British Foods, Miro Chembiotech, Cypress Systems, Diamond V, ADM, Tianxiangyuan, Biorigin, Prince Agri
