Research Summary

Selenium is a trace element and essential micronutrient that plays crucial roles in various physiological processes within the human body. As a key component of selenoproteins, selenium functions as an antioxidant, helping to neutralize free radicals and protect cells from oxidative damage. It also supports thyroid function, immune system health, and reproductive health. Selenium is primarily obtained through dietary sources such as nuts, seeds, whole grains, seafood, and certain meats. While selenium deficiency is rare in well-balanced diets, inadequate intake can lead to health problems such as compromised immune function, thyroid disorders, and increased risk of certain chronic diseases. Conversely, excessive selenium intake can be toxic and cause adverse health effects. As such, maintaining adequate but not excessive selenium levels is important for overall health and well-being.

The major global manufacturers of Selenium include Hindalco Industries, American Elements, Sumitomo Metal Mining, Mitsubishi Materials, Umicore, II-VI Incorporated, 5N Plus, Aurubis, Nippon Rare Metal, Able Target Limited, Maruti Chemicals, Shinko Chemical, Pan Pacific Copper, Behn Meyer & Company, Salvi Chemical industries, JX

Nippon Mining & Metals, Leshan Kaiya Photoelectric Technology, etc. The global players competition landscape in this report is divided into three tiers.
