Research Summary

A self-adhesive elastic bandage, also known as a cohesive bandage or self-adherent wrap, is a versatile medical dressing commonly used to secure wound dressings, provide compression support, and immobilize injuries. These bandages are made from a stretchable and flexible material such as elastic or non-woven fabric coated with a cohesive adhesive that sticks to itself when wrapped around a limb or body part. Unlike traditional adhesive bandages, self-adhesive elastic bandages do not adhere to the skin, hair, or clothing, making them easy to apply and remove without causing pain or irritation. They are adjustable, allowing for customized compression and support levels, and are breathable to promote airflow and moisture management. Self-adhesive elastic bandages are widely used in first aid kits, sports medicine, and veterinary care for treating sprains, strains, and other injuries requiring compression and support.

The major global manufacturers of Self-adhesive Elastic Bandage include 3M, Urgo Medical, Zhende Medical, Winner Medical, Cokingmed, HYNAUT, Wuxi Beyon Medical Products, Nanfang Medical, etc. The global players competition landscape in this report
