By 2025, China's market size is expected to be Million USD, representing approximately % of the global market share.

Research Summary

A semi-hermetic compressor is a type of compressor commonly used in refrigeration and air conditioning systems that combines features of both hermetic and open-type compressors. Unlike hermetic compressors, which have a permanently sealed housing, semi-hermetic compressors have a housing that can be opened for maintenance and repair, typically via bolts or screws. However, unlike open-type compressors, the motor and compressor components are enclosed within the same housing, providing better protection against environmental contaminants and reducing the risk of refrigerant leaks. Semi-hermetic compressors offer a balance between the compactness and efficiency of hermetic compressors and the serviceability of open-type compressors, making them suitable for a wide range of applications where reliability, performance, and ease of maintenance are essential.

The major global manufacturers of Semi-hermetic Compressor include BITZER, Panasonic, Emerson, Frascold, Fujian Xueren Co., GEA, Fusheng, Dorin, Zhejiang Daming Refrigeration Technology, Jiangsu Xuemei Refrigeration Equipment, Hanbell,

CAREL, Lixi Refrigerating Equipment, etc. The global players competition landscape in this report is divided into three tiers.
