Research Summary

A semi-trailer is a type of trailer commonly used in the transportation industry for hauling goods over long distances. Unlike full trailers, which are stand-alone units, semi-trailers require a tractor unit, also known as a semi-truck or tractor-trailer, to provide propulsion and support at the front. The semi-trailer is attached to the tractor unit via a hitch mechanism called a fifth wheel, allowing for efficient coupling and decoupling. Semi-trailers come in various configurations and sizes, catering to different cargo types and transportation needs. They typically have a large cargo area and may feature specialized equipment such as refrigeration units or hydraulic lift gates for handling specific types of freight. Semi-trailers are essential components of the logistics industry, facilitating the movement of goods on highways and roads worldwide.

The major global manufacturers of Semi-Trailer include Mercedes-Benz Group, Schmitz Cargobull, Great Dane, Utility Trailer, Paccar, Volvo, Wabash National Corporation, Fontaine, Hyundai Translead, Navistar, Kogel Trailer Gmbh, Schwarzmuller Group, CIMC, Liangshan Huayu, SINOTRUK, FAW Siping, Huida Heavy, etc. The global players competition landscape in this report is divided into three tiers.
