Research Summary

Serial USB converters are devices that enable communication between serial devices and computers via USB (Universal Serial Bus) ports. They convert serial data signals from devices such as RS232, RS485, or RS422 into USB-compatible signals, allowing serial devices to connect to modern computers or laptops that may lack traditional serial ports. Serial USB converters typically consist of a cable with a USB connector on one end and a serial connector (such as DB9 or DB25) on the other end, along with integrated electronics for signal conversion. These converters offer convenient plug-and-play functionality and are often used for connecting legacy serial devices such as printers, scanners, modems, and industrial equipment to newer computers or for adding additional serial ports to expand connectivity options. They provide a cost-effective and versatile solution for bridging the gap between legacy serial equipment and modern computing devices.

The major global manufacturers of Serial USB Converters include Digi International, Moxa, Contec, VS Vision Systems, RAYON, Brainboxes Limited, OMRON, UTEK
