These cabinets provide a secure and controlled environment for storing servers, networking devices, power distribution units (PDUs), and other IT equipment. Server cabinets typically feature a sturdy metal frame with adjustable mounting rails to accommodate various sizes and configurations of equipment. They often include cable management features such as cable trays, cable rings, and vertical cable managers to facilitate neat and organized cable routing. Additionally, server cabinets may offer ventilation options such as fans or perforated doors to ensure adequate airflow and cooling for the enclosed equipment.
