Sharps containers are specialized receptacles designed for the safe disposal of medical sharps, which are objects capable of puncturing or cutting the skin, such as needles, syringes, lancets, and scalpels. These containers are typically made of puncture-resistant materials such as hard plastic or metal and feature a secure lid to prevent accidental exposure to sharps. Sharps containers are essential in healthcare facilities, laboratories, and other settings where medical procedures are performed, as they help prevent injuries and reduce the risk of infection transmission to healthcare workers, patients, and the community.
