### Research Summary

A silver-based antimicrobial agent is a material containing silver ions, silver nanoparticles, or silver compounds designed to inhibit the growth and proliferation of microorganisms such as bacteria, viruses, and fungi. Silver has long been recognized for its potent antimicrobial properties, as it disrupts microbial cell membranes, inhibits enzyme functions, and interferes with DNA replication, thereby preventing microbial survival and reproduction. Silver-based antimicrobial agents are utilized in various applications, including medical devices, wound dressings, textiles, water purification systems, and consumer products, where maintaining a hygienic environment and preventing the spread of infections is essential. These agents provide effective and long-lasting protection against a broad spectrum of pathogens while remaining relatively safe for human use, making them valuable tools in combating microbial contamination and reducing the risk of infectious diseases.

The major global manufacturers of Silver-based Antimicrobial Agent include BASF, Microban, Toagosei, Sciessent, Milliken, DuPont, Pure Bioscience, Ishizuka Glass
