Research Summary

Sliding door hardware refers to the components and mechanisms used to facilitate the smooth operation of sliding doors. These hardware systems typically include tracks, rollers, guides, handles, locks, and other accessories designed to support and control the movement of sliding doors along a designated path. Tracks are mounted horizontally or vertically to the door frame or surrounding structure, providing a guide for the door to slide open and closed. Rollers, often mounted on the bottom of the door, glide along the tracks, enabling effortless movement. Guides help keep the door aligned and prevent it from swinging or rattling during operation. Handles and locks provide users with a means to open, close, and secure the door. Sliding door hardware systems come in various designs and configurations to accommodate different door sizes, weights, materials, and architectural styles, offering versatility and functionality for both residential and commercial applications.

The major global suppliers of Sliding Door Hardware include DTC, Blum Inc, Taiming, Jusen, ADAMS, Hettich, King Slide Works Co. Ltd, ASSA ABLOY, Accuride, Formenti &
