Research Summary

A slotted brake disc is a type of automotive brake rotor designed with precision-cut grooves or slots on its surface to enhance braking performance. These slots help expel gas, dust, and water from the contact area between the brake pad and disc, improving friction and reducing brake fade under high temperatures or heavy use. Commonly used in performance vehicles and demanding driving conditions, slotted discs also promote more consistent pad wear and better bite during braking. While they may produce more noise and wear on pads compared to standard discs, their ability to maintain braking efficiency makes them a popular choice for sports and high-performance applications.

The major global manufacturers of Slotted Brake Disc include Brembo, Bosch, Continental(ATE), Winhere, EBC Brakes, ADVICS, KGC, DBA, DIXCEL, Wilwood, Centric, GM (ACDelco), HAWK, Otto Zimmermann, GiroDisc, SP-performance, Chihon Machinery, DFC, MTEC Brakes, etc. The global players competition landscape in this report is divided into three tiers.
