Smoking shelters are designated areas within public or private spaces that provide a designated and enclosed environment for individuals to smoke cigarettes or use other tobacco products while offering protection from the elements. Typically constructed with durable materials such as metal or glass, smoking shelters often feature ventilation systems to prevent the buildup of smoke and ensure a comfortable environment for smokers. These shelters are commonly found in workplaces, airports, hospitals, and other public areas where smoking is permitted but restricted to designated areas. Smoking shelters help to minimize exposure to secondhand smoke for non-smokers, maintain cleanliness and safety by containing cigarette litter, and promote compliance with smoking regulations and policies.
