Research Summary

A snow chain, also known as tire chains or snow cables, is a traction device designed to enhance the grip of vehicle tires on snow and ice-covered roads. Typically made of metal links or cables, snow chains are wrapped around the tires of vehicles such as cars, trucks, and SUVs, providing additional traction by biting into the snow and ice and increasing friction between the tires and the road surface. Snow chains are particularly useful in areas with frequent snowfall or icy conditions, offering improved stability, control, and braking performance when driving on slippery roads. They are essential safety equipment for motorists traveling in winter weather conditions, helping to reduce the risk of accidents and ensuring safer and more confident driving in adverse conditions.

The major global manufacturers of Snow Chain include Pewag Group, Rud, TRYGG(Nosted), Peerless(KITO), Maggi Group Spa, Ottinger, Laclede Chain, Gowin, ATLI Industry, Lianyi, etc. The global players competition landscape in this report is divided into three tiers.
