Research Summary

Sodium borohydride, with the chemical formula NaBH_4 , is a versatile and powerful reducing agent widely used in organic synthesis and industrial processes. It is a white crystalline solid that dissolves well in water. Sodium borohydride is primarily known for its ability to donate hydride ions (H^-) in reactions, effectively reducing carbonyl compounds such as aldehydes and ketones to their corresponding alcohols. This reduction reaction is mild and selective, making sodium borohydride valuable in the pharmaceutical, fragrance, and fine chemical industries for synthesizing complex organic molecules. Additionally, it finds applications in the production of certain metal alloys, as a hydrogen storage material, and in fuel cell technologies. Despite its reactivity, sodium borohydride is handled under controlled conditions due to its potential for exothermic reactions with water and organic solvents.

The major global manufacturers of Sodium Borohydride include Guobang Pharmaceutical, Ascensus Specialties, Ningxia Best Pharmaceutical, Kemira, Jiangsu Hongzi, JSC Aviabor, etc. The global players competition landscape in this report is

divided into three tiers.
