Research Summary

Sodium tripolyphosphate (STPP) is an inorganic compound consisting of a chain-like structure formed by tetrahedral phosphate units linked together. It is a white crystalline powder that is highly soluble in water and exhibits strong alkalinity. STPP is primarily used as a water softener and detergent builder in household and industrial cleaning products, such as laundry detergents, dishwasher detergents, and industrial cleaners. Its ability to sequester calcium and magnesium ions helps prevent them from interfering with the cleaning action, thereby improving the effectiveness of detergents in hard water conditions. STPP also serves as a dispersing agent and emulsifier in various applications, including as a food additive to improve the texture and moisture retention in processed meats and seafood. While widely used, concerns over its environmental impact, particularly in terms of eutrophication in water bodies, have led to regulatory restrictions on its use in some regions.

The major global manufacturers of Sodium Tripolyphosphate include Mosaic Company, HBCChem, Inc, Hubei Xingfa Chemicals Group, Yuntianhua Group, Chengxing

Industrial Group, Tianyuan Group, Wengfu Group, Wuhan Inorganic Salt Chemical, Sichuan Jinguang Industrial Group, Yunnan Nanlin Group, Sichuan Bluesword Chemical, Guizhou Sino-Pho Chemical, etc. The global players competition landscape in this report is divided into three tiers.
