Research Summary

A sous vide cooking machine, also known simply as a sous vide machine or immersion circulator, is a kitchen appliance used for a cooking technique known as sous vide. Sous vide, which means "under vacuum" in French, involves cooking food in vacuum-sealed bags submerged in a water bath held at a precisely controlled temperature. The sous vide machine circulates and heats the water to maintain this temperature with high accuracy, typically within tenths of a degree Celsius. This gentle and precise cooking method ensures consistent results and allows for precise control over doneness and texture, whether cooking meats, fish, vegetables, or desserts.
