### Research Summary

Soy protein concentrates (SPC) are products made from defatted soybean flakes by removing the soluble carbohydrates. This process increases the protein content to around 65-70% by weight. SPCs are versatile food ingredients widely used in the food industry for their functional and nutritional properties. They serve as economical sources of high-quality protein and are utilized in various food applications such as meat products, dairy analogs, baked goods, and nutritional supplements. SPCs contribute to improving texture, binding ability, moisture retention, and protein fortification in food products. Additionally, they are low in fat and cholesterol-free, making them beneficial for heart health. As a plant-based protein, soy protein concentrates are suitable for vegetarian, vegan, and health-conscious diets, offering essential amino acids and nutrients like iron and calcium.

The major global manufacturers of Soy Protein Concentrates include ADM, CJ Selecta, IFF, Gushen Biological Technology Group, Caramuru Alimentos, Yuwang Group, Shandong Wonderful Industrial Group, Fujian Changde Protein Science and
