Research Summary

Squalane is a saturated and stable hydrocarbon derived primarily from squalene, a natural compound found in the sebum of human skin and in the livers of certain fish. Squalane is highly prized in skincare and cosmetic products for its excellent emollient properties, which help to moisturize and soften the skin without leaving a greasy residue. It is a clear, odorless, and lightweight oil that spreads easily on the skin, enhancing its suppleness and smoothness. Squalane is known for its ability to improve the skin barrier function, reduce moisture loss, and protect against environmental stressors. It is suitable for all skin types, including sensitive and acne-prone skin, due to its non-comedogenic nature. Squalane is also used in hair care products to impart shine and manageability. Additionally, it has applications in pharmaceuticals and as a carrier oil in various formulations due to its stability and compatibility with other ingredients.

The major global manufacturers of Squalane include Kishimoto, EFP, VESTAN, Maruha Nichiro, Arista Industries, Amyris, Sophim, Croda, Nucelis LLC, Caroiline, Clariant, The Innovation Company, Henry Lamotte OILS GmbH, Kuraray, NOF Group, Ineos, etc. The global players competition landscape in this report is divided into three tiers.
