Research Summary

Stearates are salts or esters derived from stearic acid, a long-chain fatty acid commonly found in both animal and vegetable fats. They are widely used in various industries due to their lubricating, anti-caking, and stabilizing properties. In the pharmaceutical and cosmetics sectors, stearates, such as magnesium stearate and calcium stearate, act as lubricants and flow agents, enhancing the texture and consistency of tablets and creams. In the plastics and rubber industries, they function as release agents, preventing products from sticking to molds and equipment. Additionally, stearates are used in food processing as emulsifiers and in lubricants and greases to reduce friction and wear. Their versatility and effectiveness make them essential additives across a wide range of applications.

The major global manufacturers of Stearates include Baerlocher, FACI SPA, Dover Chemical, CHNV Technology, Sun Ace Kakoh, BELIKE Chemical, PMC Biogenix, Anhui Shafeng, Tianjin Langhu, Linghu Xinwang Chemical, Peter Greven, Mittal Dhatu, Jiangxi Hongyuan, Valtris, James M.
