These risks can arise from various sources, including natural disasters, geopolitical instability, economic fluctuations, supplier failures, quality issues, transportation delays, and cybersecurity threats. SCRM aims to proactively identify and analyze potential risks across the entire supply chain, from raw material sourcing to product delivery, and develop strategies to mitigate these risks and ensure continuity of operations. Key components of SCRM include risk assessment and mapping, scenario planning, supplier diversification and redundancy, supply chain visibility and transparency, contingency planning, and collaboration with stakeholders.
