These gowns are designed to provide a barrier against blood, bodily fluids, and other potentially infectious materials, protecting both the wearer and the patient. Surgical gowns are typically made of non-woven fabric or other fluid-resistant materials and are designed to cover the torso, arms, and legs of the wearer. They may feature long sleeves with elastic cuffs, adjustable neck and waist ties, and a back closure to ensure a secure fit and full coverage. Surgical gowns are available in various styles and levels of protection, including disposable gowns for single-use applications and reusable gowns for multiple wears.
