Swim fins, also known as flippers, are aquatic footwear worn on the feet to enhance swimming performance and propulsion in the water. They typically consist of a rigid or flexible blade attached to a foot pocket or strap that secures the fin to the foot. Swim fins come in various shapes, sizes, and materials, including rubber, plastic, and silicone, and they are available for different swimming activities and skill levels. When worn properly, swim fins increase the surface area of the foot, allowing swimmers to generate more power and speed with each kick.
