### Research Summary

TCT (Tungsten Carbide-Tipped) circular saw blades are cutting tools used in woodworking, metalworking, and other industries to make precise and efficient cuts in various materials, including wood, metal, plastic, and composite materials. These circular saw blades feature teeth tipped with tungsten carbide, a hard and durable material that enhances the blade's cutting performance and longevity. The tungsten carbide tips are brazed onto the steel body of the blade, providing sharp cutting edges that can withstand high-speed cutting operations and prolonged use without dulling. TCT circular saw blades are available in a variety of sizes, tooth configurations, and cutting geometries to suit different cutting applications and materials. They are commonly used in table saws, miter saws, panel saws, and other power tools to achieve clean, accurate cuts with minimal splintering or chipping. TCT circular saw blades are preferred for their durability, versatility, and ability to produce smooth and precise cuts in a wide range of materials.

The major global manufacturers of TCT Circular Saw Blades include Bosch, Zhengyang
