Research Summary

Thermal Transfer Overprinting (TTO) equipment is a type of printing technology used in packaging and labeling applications. It employs the thermal transfer process, where a thermal printhead selectively heats areas of an inked ribbon, transferring the ink onto the substrate. TTO is commonly used for printing variable information such as barcodes, date codes, and batch numbers onto flexible packaging materials like labels and films. The TTO equipment typically consists of a thermal printhead, a ribbon supply, and a system for controlling the printing parameters. This technology provides high-resolution printing with excellent durability, making it suitable for applications in industries such as food packaging, pharmaceuticals, and product labeling where clear and reliable printing of variable data is essential for traceability and compliance.

The major global manufacturers of Thermal Transfer Overprinting (TTO) Equipment include Videojet, Domino, EDM, Eidos, Markem-Imaje, DIKAI, Novexx Solutions GmbH, Savema, Yanjie Technology, Control Print, FlexPackPRO, Keyence, Diagraph, Linx,
