Research Summary

Thermoplastic Polyester Elastomer (TPEE) is a type of thermoplastic elastomer that combines the properties of polyester with elastomeric characteristics. TPEE is known for its high-performance attributes, including excellent flexibility, resilience, and durability. It can be melted and molded multiple times without undergoing significant degradation, allowing for ease of processing and recycling. TPEE is widely used in various applications such as automotive components, consumer goods, and industrial products where a combination of elasticity and thermoplastic processability is required. Its versatility, weather resistance, and resistance to chemicals contribute to its suitability for diverse industries, and its ability to be molded into intricate shapes through processes like injection molding makes it a valuable material for manufacturing a range of products with both functional and aesthetic requirements.

The major global manufacturers of Thermoplastic Polyester Elastomer (TPEE) include DuPont, DSM, Toyobo, Taiwan Changchun, Jiangyin Hetron, Celanese, SK Chemicals,
