### Research Summary

Third-party risk management (TPRM) is a systematic approach that organizations adopt to identify, assess, and mitigate the potential risks associated with their relationships with external parties. These external parties, often referred to as third parties, can include suppliers, vendors, service providers, or any other entities with which the organization has business connections. TPRM involves evaluating the security, compliance, financial stability, and overall reliability of these third parties to ensure that they align with the organization's risk tolerance and regulatory requirements. The goal is to proactively manage and minimize the impact of any potential risks that third-party relationships may pose to the organization's operations, reputation, and security. An effective TPRM program typically includes due diligence, ongoing monitoring, and the establishment of risk mitigation strategies and contingency plans.

The major global suppliers of Third-Party Risk Management include Bitsight Technologies, Genpact, NAVEX Global, MetricStream, SAI Global, Resolver, Galvanize, IBM, Optiv Security, RSA Security (Dell), RapidRatings, Venminder,
