Research Summary

Threonine is an essential amino acid, which means that it cannot be synthesized by the human body and must be obtained through the diet. It is one of the 20 standard amino acids that serve as the building blocks of proteins. Threonine plays a crucial role in various physiological processes, including the formation of collagen, elastin, and tooth enamel. It is also involved in the synthesis of neurotransmitters and is a precursor to the amino acid isoleucine. Threonine is found in protein-rich foods such as meat, dairy products, nuts, and certain grains. Adequate threonine intake is essential for maintaining overall health and supporting the proper functioning of the body's cells and tissues.

The major global manufacturers of Threonine include Meihua, Ajinomoto Group, CJ CheilJedang, Evonik, Fufeng, NB Group, Guoguang Biochemistry, Star Lake Bioscience, GLOBAL Bio-Chem, ADM, etc. The global players competition landscape in this report is divided into three tiers.
