Research Summary

Torula yeast refers to a type of yeast derived from the species *Candida utilis*. Unlike traditional baker's yeast, torula yeast is not commonly used for leavening bread but is instead utilized in the food industry for its flavor-enhancing properties. This yeast is often employed as a seasoning or flavoring agent, particularly in savory and umami-rich foods. Torula yeast extract, a byproduct of the yeast, is known for its ability to enhance the taste of various dishes, including soups, sauces, snacks, and processed foods. It is valued for its natural glutamic acid content, which contributes to a savory or umami flavor profile. Torula yeast extract is also recognized for being a suitable option for individuals with gluten intolerance, as it does not contain gluten.

The major global manufacturers of Torula Yeast include Lallemand, Kenegade, Kohjin, Gluthatheon, Koninklijke DSM, Oriental Yeast, Synergy Flavors, Chr.
