### Research Summary

Tung oil is a drying oil derived from the seeds of the tung tree (*Vernicia fordii*), native to East Asia. The oil has been traditionally used as a wood finish for centuries due to its ability to cure and form a protective, water-resistant coating on surfaces. Tung oil is known for its durable and glossy finish, enhancing the natural beauty of wood while providing protection against moisture and mildew. It is often preferred for finishing furniture, wooden floors, and other woodworking projects. Tung oil polymerizes when exposed to air, forming a hard and waterproof surface. This natural drying process sets it apart from non-drying oils and contributes to its popularity in woodworking applications. Additionally, tung oil is used in various products such as paints, varnishes, and sealants, contributing to its versatility in both traditional and modern applications.

The major global manufacturers of Tung Oil include Oleaginosa RAATZ, Wuzhou Oasis Chemicals, Xunyang Mingwen Oil, Qiubei County Shuanglong Oil, Jinxing Tung Oil, etc. The global players competition landscape in this report is divided into three tiers.
