Research Summary

Twin-screw extruders are advanced machines used in the plastic and polymer processing industry for the production of a wide range of materials, including plastic compounds, masterbatches, and polymer blends. These extruders consist of two intermeshing screws housed within a barrel, which rotate in tandem to convey, compress, melt, and mix raw materials. The design allows for precise control over the extrusion process and offers advantages in terms of mixing efficiency, output consistency, and versatility in handling various materials and formulations. Twin-screw extruders find applications in industries such as plastics manufacturing, food processing, pharmaceuticals, and compounding, contributing to the efficient and controlled processing of diverse materials for the production of finished products or intermediate materials used in subsequent manufacturing processes.

The major global manufacturers of Twin-screw Extruders include Coperion, Milacron, JSW, Shibaura Machine, Leistritz, KraussMaffei group, Battenfeld-Cincinnati, Clextral, CPM Extrusion Group, Davis-Standard, NFM, ENTEK, Buhler Technologies, Kolsite,
