### Research Summary

A two-component polyurethane waterproof coating is a specialized protective coating used to waterproof surfaces like concrete, metal, or wood. It consists of two components: a base component and a hardener. When these components are mixed together in specific proportions, they undergo a chemical reaction, forming a durable and waterproof membrane. This membrane creates a seamless barrier that prevents water penetration, protecting the underlying substrate from moisture damage and deterioration. Two-component polyurethane waterproof coatings are highly versatile, offering excellent adhesion, flexibility, and resistance to water, chemicals, and UV radiation. They are commonly used in various applications, including roofing, decks, balconies, and foundations, providing long-lasting waterproofing solutions for both residential and commercial buildings.

The major global manufacturers of Two-Component Polyurethane Waterproof Coating include SIKA, BASF, 3M, TechnoNICOL, BMI Group, Henkel, MAPEI Group, Keshun,
