Research Summary

A two-wheeler battery swapping platform is a service or infrastructure designed to facilitate the quick and convenient exchange of batteries for electric motorcycles or scooters. These platforms typically involve stations equipped with battery swapping equipment where users can swap their depleted batteries for fully charged ones, eliminating the need for lengthy charging times. Users can simply drive up to a swapping station, remove their drained battery, and replace it with a fully charged one, allowing them to continue their journey without waiting. This approach aims to address the limited range and long charging times associated with electric two-wheelers, promoting their adoption by offering a convenient and efficient solution for battery replenishment.
