### Research Summary

A tyre inflator is a portable device designed for inflating the air pressure in vehicle tires. This compact and convenient tool is commonly used by motorists to ensure that their vehicle's tires are properly inflated, promoting optimal performance, fuel efficiency, and overall safety. Tyre inflators often come with a variety of features, including pressure gauges for accurate measurement, built-in compressors that can be powered through a vehicle's electrical outlet or a separate power source, and auto-shutoff mechanisms to prevent over-inflation. Some models may also include additional functionalities like LED lights for visibility in low-light conditions or adaptors for inflating other inflatable items such as sports equipment or bicycle tires.
