Research Summary

An Ultra Short Throw (UST) projector is a type of projector that is designed to project large images from an extremely short distance. Unlike traditional projectors that need a significant distance between the projector and the screen or wall to create a sizable image, UST projectors can produce large projections from just a few inches or centimeters away. This is achieved through advanced optics and lens technologies. UST projectors are often used in home entertainment systems, classrooms, and boardrooms where space is limited, providing a practical solution to avoid shadows and obstructions caused by people walking in front of the projector. They are known for their versatility, allowing users to enjoy big-screen experiences in confined spaces without the need for extensive room adjustments.

The major global manufacturers of Ultra Short Throw Projector include Panasonic, Epson, ViewSonic, Da-Lite(Legrand), BenQ, Samsung, VAVA, Stewart Filmscreen, Grandview, HISENSE, Screen Innovations, VIVIDSTORM, Elite Screens Inc., FENGMI, SNOWHITE, XY Screens, Sams AV-Tech, Telon, EluneVision, etc. The global players
