### Research Summary

Uranium is a naturally occurring, radioactive element with the chemical symbol U and atomic number 92. It is a heavy metal found in various concentrations in Earth's crust and is notable for its use as a fuel in nuclear reactors and for the production of nuclear weapons. The most prevalent isotope of uranium is uranium-238, but uranium-235, which constitutes only about 0.7% of naturally occurring uranium, is crucial for nuclear applications. Uranium undergoes radioactive decay, emitting alpha particles, and it can be enriched to increase the proportion of uranium-235 for nuclear fuel purposes. The nuclear fission of uranium-235 releases a significant amount of energy, making it a key component in the generation of electricity in nuclear power plants. The mining, processing, and use of uranium are subject to strict regulations due to its radioactive properties and potential environmental and health impacts.

The major global manufacturers of Uranium include Sinosteel, CNNC, Sinohydro, Jinduicheng Molybdenum, JiangXi Copper Corporation, Cameco, Orano, BHP Billiton, Kazatomprom, APM3, ERA, AtomRedMetZoloto?ARMZ?, Paladin, Navoi, Rio Tinto Group, etc. The global players competition landscape in this report is divided into three

tiers. The first tier comprises global leading enterprises that command a substantial market share, hold a dominant industry position, possess strong competitiveness and influence, and generate significant revenue. The second tier includes companies with a notable market presence and reputation; these firms actively follow industry leaders in product, service, or technological innovation and maintain a moderate revenue scale. The third tier consists of smaller companies with limited market share and lower brand recognition, primarily focused on local markets and generating comparatively lower revenue.

This report studies the market size, price trends and future development prospects of Uranium. Focus on analysing the market share, product portfolio, prices, sales, revenue and gross profit margin of global major manufacturers, as well as the market status and trends of different product types and applications in the global Uranium market.
