### Research Summary

Urea strippers are industrial units used in the process of removing or stripping ammonia from urea solutions. Urea solutions are commonly employed in various industrial applications, including urea production and the treatment of exhaust gases in selective catalytic reduction (SCR) systems for reducing nitrogen oxide (NOx) emissions from combustion processes. The urea stripper plays a crucial role in separating ammonia from urea solutions by applying heat, which causes the release of ammonia gas. This stripped ammonia can then be utilized in downstream processes or reactions. Urea strippers are integral components in systems designed to control emissions and optimize the efficiency of processes where urea is employed for environmental or industrial purposes.

The major global manufacturers of Urea Strippers include Casale SA, Larsen & Toubro, Christof Group, FBM Hudson Italiana, Officine Luigi Resta, ISGEC, ALFA LAVAL, Mangiarotti, NIIK, Paramount, Stamicarbon, Saipem S.p.A., Toyo Engineering, etc. The global players competition landscape in this report is divided into three tiers.
