Research Summary

Vegetable capsules are a type of capsule used in the pharmaceutical, nutraceutical, and dietary supplement industries to encapsulate various substances such as powdered herbs, vitamins, or other formulations. These capsules are typically made from plant-derived materials, offering an alternative to traditional gelatin capsules and making them suitable for vegetarian and vegan consumers. Commonly, vegetable capsules are crafted from hydroxypropyl methylcellulose (HPMC), a substance derived from the cellulose found in plant fibers. These capsules are known for their versatility, as they dissolve quickly, allowing for efficient absorption of the enclosed ingredients in the digestive system.
