Research Summary

Vegetable (HPMC) capsules are a type of capsule used in pharmaceuticals, supplements, and nutraceuticals. HPMC stands for hydroxypropyl methylcellulose, which is a plant-based polymer derived from the cellulose in wood or plant fibers. These capsules provide an alternative to traditional gelatin capsules, making them suitable for vegetarian and vegan consumers. Vegetable capsules are known for their ability to dissolve quickly, allowing for efficient and consistent release of the encapsulated contents. They are also free from potential concerns associated with animal-derived products, such as gelatin allergies or religious dietary restrictions. Vegetable capsules are widely used in the pharmaceutical and dietary supplement industries as a plant-friendly and versatile option for encapsulating various formulations.
