Research Summary

Vitamins are essential organic compounds that the human body requires in small amounts to function properly. They play crucial roles in various physiological processes, including metabolism, immunity, and overall health maintenance. There are 13 essential vitamins, which are categorized into two groups: water-soluble vitamins (such as vitamin C and B-complex vitamins) and fat-soluble vitamins (such as vitamins A, D, E, and K). Each vitamin serves specific functions in the body, such as supporting cell growth and repair, acting as antioxidants to protect against oxidative stress, promoting bone health, and facilitating energy production. While vitamins are naturally found in certain foods, they can also be obtained through dietary supplements in cases where dietary intake may be insufficient. Adequate intake of vitamins is crucial for preventing deficiency-related diseases and maintaining optimal health and well-being.

The major global manufacturers of Vitamin include DSM, Lonza, CSPC, BASF, ZHEJIANG MEDICINE, LUWEI PHARMACY, NORTHEAST PHARM, North China Pharmaceutical, NHU, JUBILANT, Vertellus, Brother, ADISSEO, GARDEN BIOCHEMICAL HIGH-TECH, KINGDOMWAY, etc. The global players competition
