### Research Summary

Waterborne epoxy coatings are a type of epoxy coating system where the epoxy resin is dispersed in water. These coatings offer numerous advantages over solvent-based epoxy coatings, including lower VOC emissions, reduced flammability, and improved safety for workers and the environment. Waterborne epoxy coatings are commonly used for a variety of applications, including flooring, concrete protection, metal protection, and corrosion resistance. They provide excellent adhesion, durability, and chemical resistance, making them suitable for use in harsh environments such as industrial facilities, warehouses, and commercial buildings. Additionally, waterborne epoxy coatings are easy to apply and clean up, making them a preferred choice for many contractors and applicators. Overall, waterborne epoxy coatings offer high performance and environmental benefits, making them an ideal choice for a wide range of coating applications.
