### Research Summary

Waterborne epoxy resin is a type of epoxy resin that is dispersed in water, forming a stable emulsion. Unlike traditional solvent-based epoxy resins, which use volatile organic solvents as carriers, waterborne epoxy resins utilize water as the primary carrier medium. This results in lower levels of volatile organic compounds (VOCs) emitted during application, making them environmentally friendly and safer for workers. Waterborne epoxy resins are commonly used in coatings, adhesives, and sealants for various applications, including flooring, concrete protection, metal protection, and corrosion resistance. They offer excellent adhesion, durability, and chemical resistance properties, similar to solvent-based epoxy resins, while also providing ease of application and cleanup. Additionally, waterborne epoxy resins can be formulated with various additives and pigments to meet specific performance and aesthetic requirements. Overall, waterborne epoxy resins offer high performance and environmental benefits, making them a preferred choice for many coating and adhesive applications.

The major global manufacturers of Waterborne Epoxy Resin include Huntsman, Westlake, Olin Corporation, Kukdo, Allnex, NPC, Sanmucem, Kpb, Yyhuaxing, Zjab, etc. The global players competition landscape in this report is divided into three tiers.
